# RENEWABLE ENERGY

Renewable energy is energy that is collected from renewable resources that are naturally replenished on a human timescale. It includes sources such as sunlight, wind, rain, tides, waves, and geothermal heat. Although most renewable energy sources are sustainable, some are not.

## Renewable energy sources

Solar energy from the sun.

Geothermal energy from the heat inside the earth.

Wind energy.

Biomass from plants.

Hydropower from flowing water.

# Renewable Energy

## Renewables Resources

### Different types of Renewables Resources:

Solar Energy

Wind Energy

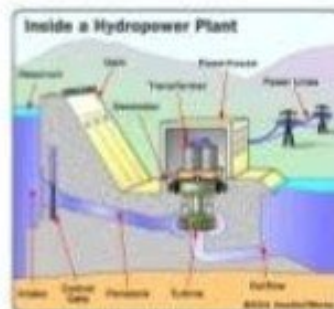

Rain Water

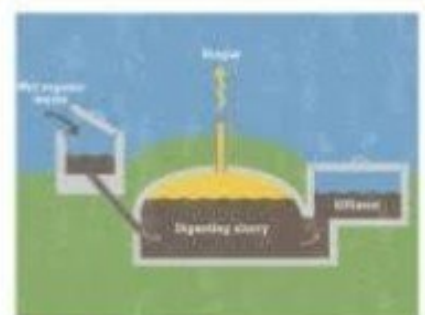

Ocean Energy

Geothermal Energy

Hydropower Energy

Bioenergy

# RENEWABLE ENERGY TOKEN

Renewable Energy Token launched on Jan 04, 2022, with 50 quadrillion tokens created at genesis. 40.00% of the total supply was burned manually at the beginning of construction and The rest was transferred directly to the Liquidity pool and locked. In each transaction, 3% commission is deducted from the RET Which is broadcast as follows: 1% of it is divided among the holders 1% of it goes into the liquidity pool and locked 1% goes into the Team wallet and will be spent on token goals. RET has a locked liquidity pool that will be locked by the manufacturers until 2030. RET holders can receive up to 1% of the transaction amount equal to their own balance as a reward without doing anything and just keeping it in their wallets.,

To this end, creating physical projects to use wind and solar energy is one of the team's future plans. Creating physical projects, in addition to helping to protect the environment, will also benefit Ret holders. One of the important goals of the team is to involve Ret holders in the profits from the creation of physical projects. Ret holders are therefore the future shareholders of the company.

Another goal of RET is to create a game in the field of renewable power plants and familiarize people with it. The player will earn money for himself by creating a power plant and installing renewable energy equipment while playing an exciting game.

The RET token is a BEP-20 token created on January 04, 2022, for the Binance Smart Chain network and that one is designed to the functional and experience for all supporters of renewable energy.

More than ever, our world is under threat with heavy dependence on fossil fuels, especially oil and coal. Air pollution, environmental degradation, and climate change are the result of this dependence. Unprecedented global warming, rising forest fires, melting glaciers, and, rising sea levels are some of the problems caused by the excessive use of non-renewable energy. The Ret team intends to break this dependence on non-renewable energy.

To this end, creating physical projects to use wind and solar energy is one of the team's future plans.

Creating physical projects, in addition to helping to protect the environment, will also benefit Ret holders.

One of the important goals of the team is to involve Ret holders in the profits from the creation of physical projects.

Ret holders are therefore the future shareholders of the company.

Another goal of RET is to create a game in the field of renewable power plants and familiarize people with it. The player will earn money for himself by creating a power plant and installing renewable energy equipment while playing an exciting game.
